

# DiverseLink

*A Browser Extension Built for Productivity and Accessibility*

INFO 609 - Group 4: Morgan Brennan, Amy Hayton, Max Lupoli, Sarah Nichols

# INTRODUCTION

---

Neurodivergent individuals face unique challenges when accessing and navigating online content due to insufficient customization options in web browsers.

Through in-depth research and user-centric design, we've created *DiverseLink*, a browser extension offering customizable features and settings to tailor **layouts, font size and styles, color schemes, noise reduction, distraction minimization, and more** to their needs.

# METHODS OVERVIEW

---

## **SURVEY**

Conducted a mixed survey of 16 multiple-choice and open-ended questions to gather insight into existing experiences when using web browsers as a neurodivergent individual

## **PERSONA**

Developed a user persona based on the results of our user survey to gain a better understanding of our users' needs while completing tasks online

## **JOURNEY MAP**

Created a journey map to visualize our users' experience across varying touchpoints during their time online to identify potential points of friction or delight

## **CONCEPT**

Designed a conceptual model of our browser extension to address the most integral needs of our neurodivergent users found during earlier research

## **PROTOTYPE**

Built low-fidelity and high-fidelity prototypes to demonstrate the browser extension, identify areas of improvement, and ensure the final design aligned with the diverse needs of neurodivergent individuals

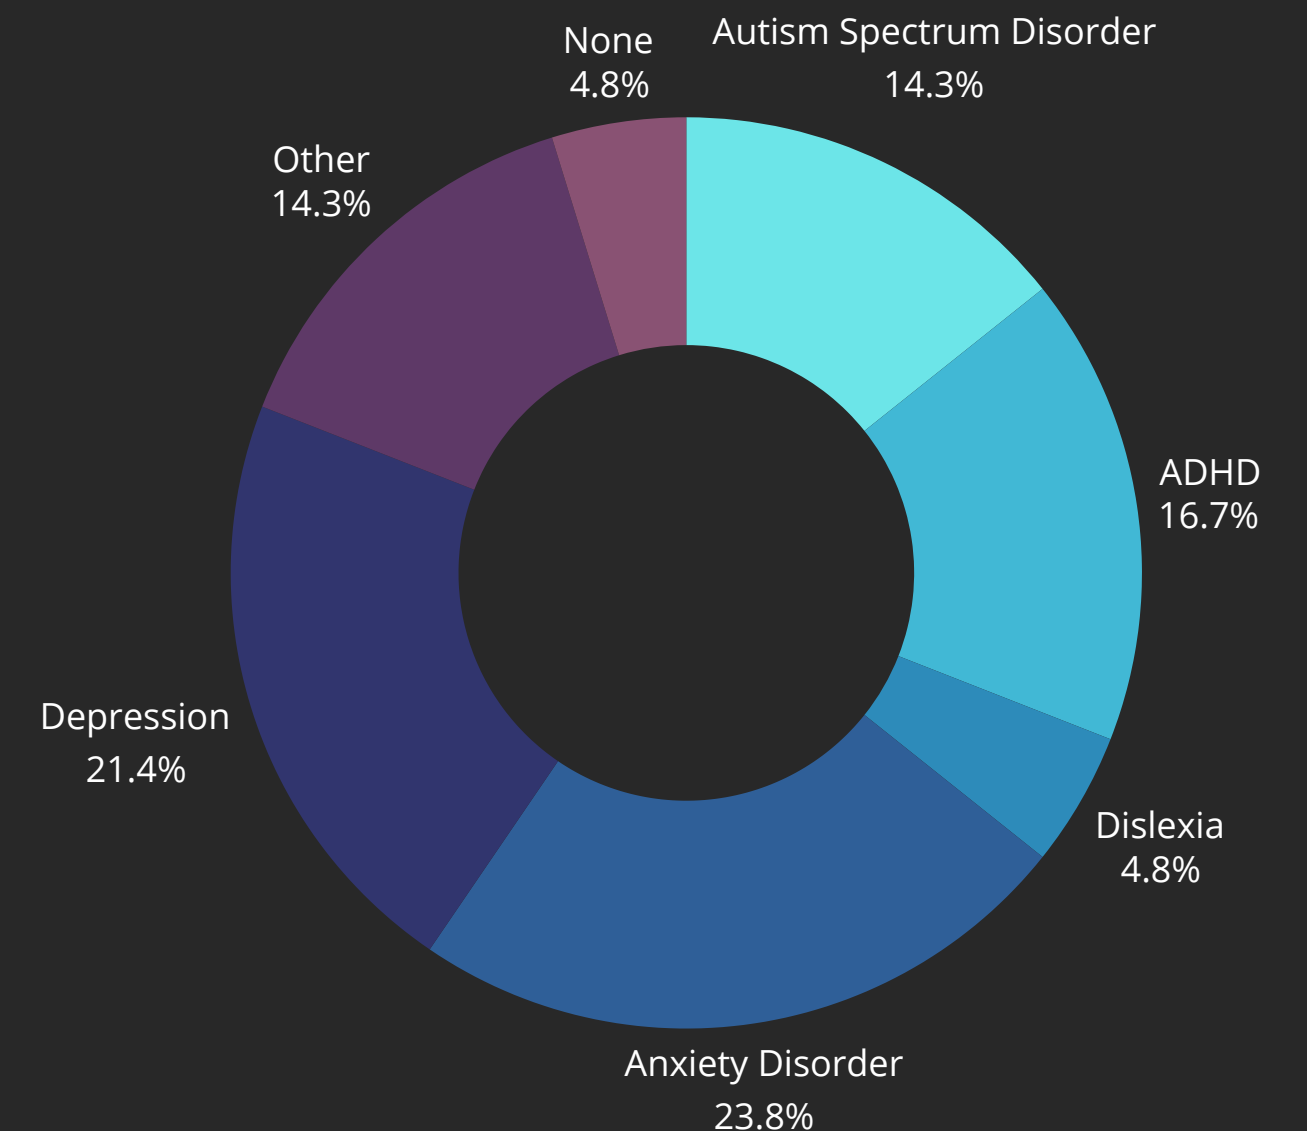

# KEY SURVEY RESULTS

Participants (16)

Interested in Browser Extension

Neurodivergent Disorders (7)

# PERSONA

	<b>Preferred Method of Communication</b> <ul style="list-style-type: none"><li>Email</li><li>Text Messaging</li><li>Social Media</li></ul>	<b>Challenges</b> <p>Emily tends to hyperfocus which can help produce high-quality work within tight deadlines, but she also tends to face burnout and overwhelmed feelings.</p> <p>Emily also faces challenges with reading and writing due to her dyslexia and ADHD. She requires extra effort in tasks that involve reading and writing and uses assistive technologies for these processes.</p>
<b>Name</b> Emily Rodriguez	<b>About</b> <p>Emily is a 36-year-old graphic designer whose creative journey is fueled by the interplay of dyslexia and ADHD. Diagnosed with these neurodivergent traits, Emily's design process is a fusion of imagination and adaptive problem-solving. Dyslexia may introduce unique challenges in reading and spelling, but Emily compensates with a keen eye for visual detail, turning each project into a work of art. With the power of hyperfocus, Emily navigates tight deadlines with creativity, transforming ideas into visually stunning realities.</p>	<b>Ideal Work Environment</b> <p>Dimly lit and organized spaces in an area with minimal distractions are ideal. An at home work environment or small office space is preferred. Supportive colleagues and a culture that values diverse perspectives is a must.</p>

# JOURNEY MAP

	Awareness	Consideration	Decision	Retention
Goals	To become aware of browser extensions that cater to neurodivergent user needs	Explores different browser extensions and understands each of the features	Choose the most suitable extension based on personal preferences	Successfully integrate the extension into their daily online activities
Feelings	Curious, Hopeful, Frustrated with current online experiences	Overwhelmed, Cautious, Optimistic	Anxious, Hopeful, Relieved	Satisfied, Engaged
Challenges	Lack of awareness of available solutions	Evaluating the effectiveness of the extensions, concerns about potential disruptions, and about privacy concerns	Making a decision among many options, fear of investing in something that may not work	Adopting new routines and habits, adjusting extension to their needs
Motivation	Seeking a more comfortable and accommodating online experience	Finding a solution that aligns with their unique needs; perhaps something customizable	Personal recommendations from neurodivergent communities, clear & accessible information on extension benefits	Noticing positive changes in their online experiences

# CONCEPT

## Text-to-Speech

When ITS is toggled on,  
close plugin UI.

Key shortcuts to pause/stop  
TTS?

Current word highlighted.

User can navigate through  
page as they would w/  
normal screen reader.

Not a lot to say here.

## Pomodoro Timer

Can appear in digital or analogue.  
(could also just  
do digital)

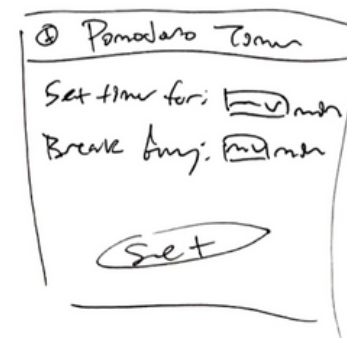

User can drag timer around screen or resize it.  
Timer Configuration

Timer doesn't restrict  
usage of device/enforce  
breaks.

or

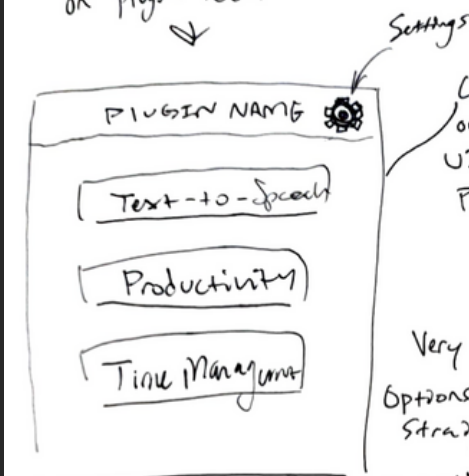

## Accessibility Browser Extension/Plugin

Variant design

Main UI, when clicking  
on plugin icon

Settings

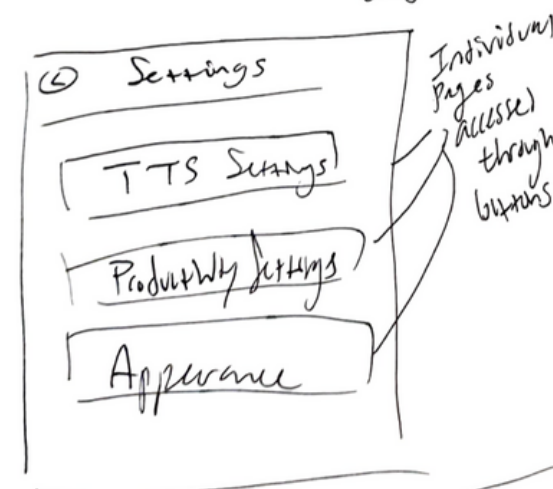

Clicking  
outside of  
UI closes  
pop up

Very basic UI.  
Options should be  
straight forward

Buttons

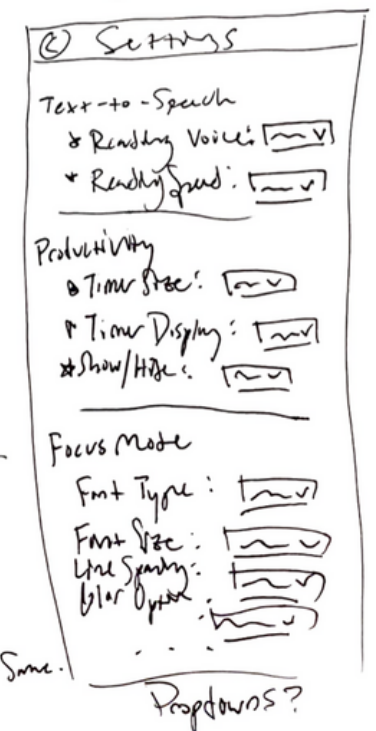

Productivity → Pomodoro Timer  
Time Management → Focus mode  
change names.

Toggles

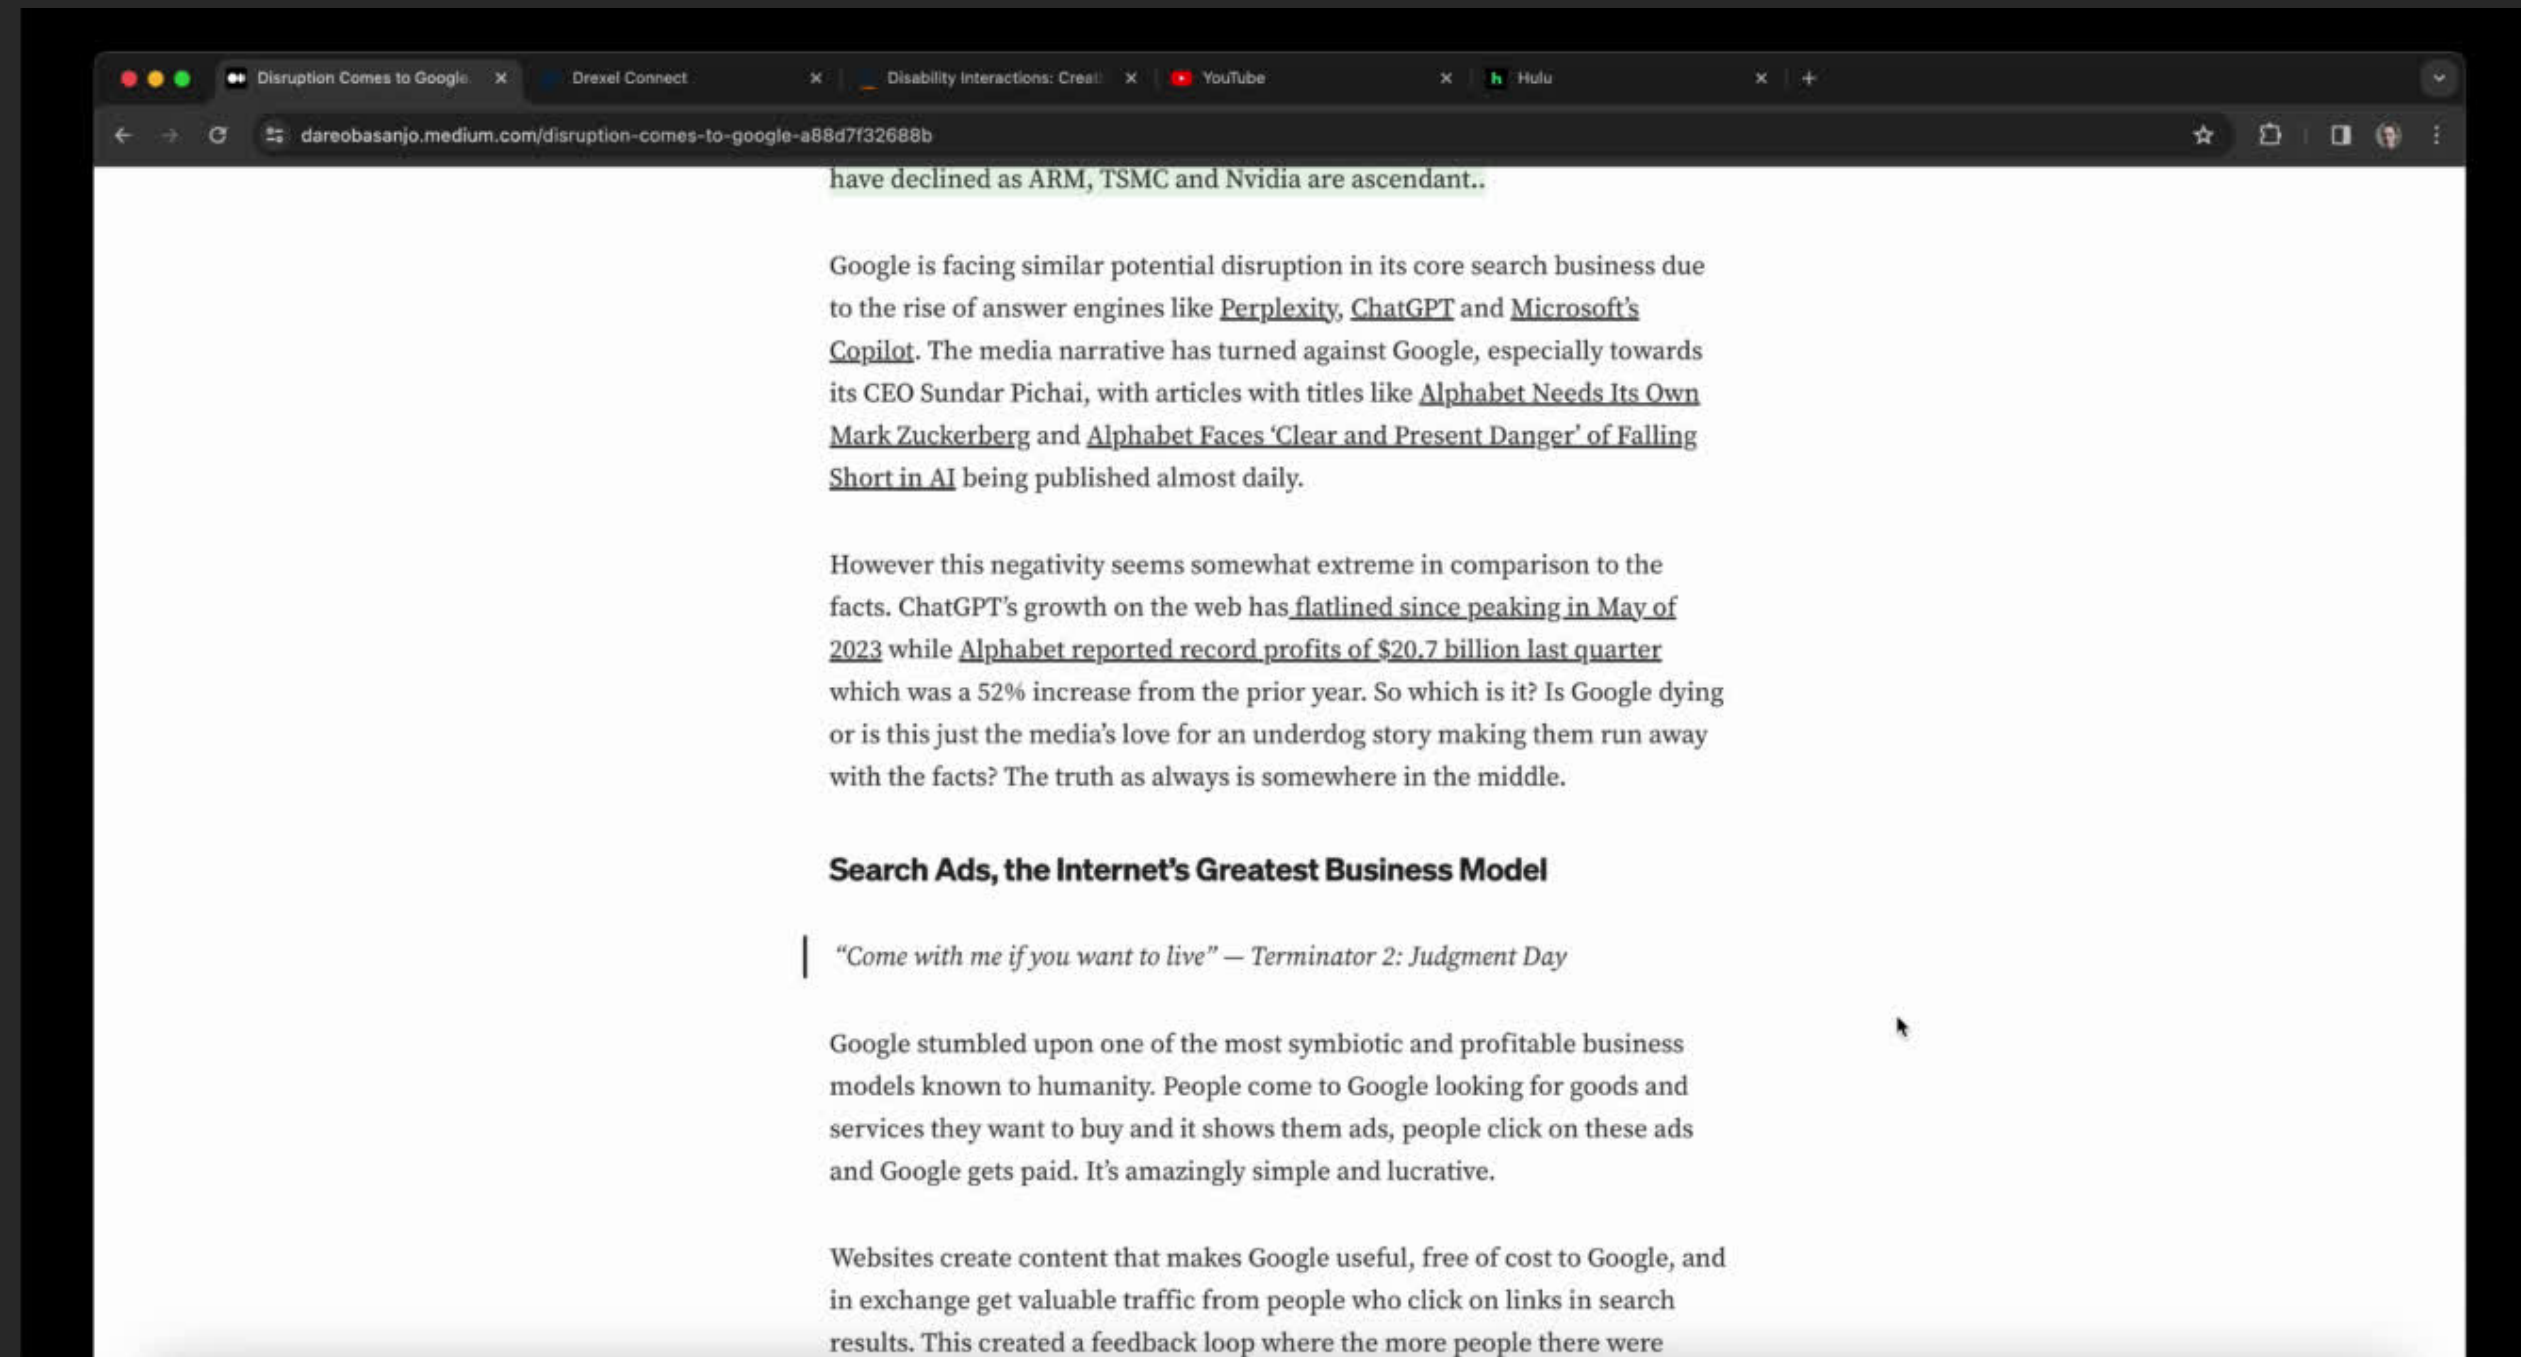

Individual  
Pages  
Accessed  
through  
buttons

OR:

Everything in are  
big list.  
Individual pages  
would display the same.
